

Simartis Announces GSMA eSIM Certification

Simartis Telecom, a 20-years experienced, dynamic and innovative provider of telecommunication solutions for global telco market, is proud to announce that it has been awarded the Security Accreditation Scheme for Subscription Management (SAS-SM) certification by the GSM Association (GSMA), confirming its position among the recognized providers of eSIM solutions. This certification follows the successful first-time completion of the Dry and Wet Audit for the Simartis's eSIM RSP solution, the [Virtual Subscription Management \(VSM\)](#).

Simartis is supporting mobile operators' eSIM deployments with the upmost level of operational security, functionality, and interoperability in full compliance with SAS-SM Standard v3.2 and the SAS Consolidated Security requirements v9.2 with certified EU hosted Data Center, Subscription Management and Data Preparation+.

The GSMA-certified eSIM solution enhances Simartis's offerings, complementing the OTA SIM and Automatic Device Management solutions, making a very compelling proposition for MNOs and MVNOs worldwide.

For the eSIM Virtual Subscription Management (VSM) to comply with the world-class security requirements specified by the GSMA SAS-SM accreditation, Simartis has implemented a robust, fully redundant software and hardware secure solution in our Data Center located in Cluj-Napoca, Romania.

Simartis's commitment to SAS-SM certification reflects its dedication to staying at the forefront of technological advancements and meeting the evolving needs of its customers. By obtaining the eSIM certification, the company will offer a wide range of benefits to its customers, including Streamlined Device Setup, Enhanced Connectivity, Global Reach and Simplified Device Management.

[Constantin Nechita, Product Director at Simartis]:

"We are thrilled to announce our SAS-SM certification. This exceptional first attempt successful achievement reconfirms the efforts and impressive know-how of our team, our dedication/commitment to delivering innovative solutions that enhance the connected experiences our customers can offer to their subscribers. eSIM technology is revolutionizing the way devices connect, empowering users with unprecedented flexibility and convenience, and we are excited to be an integral part of this dynamic evolution."

For further details our team is available to answer any inquiries. It would be a pleasure to share our experience, showcase our e-SIM SMDP+ and tailor the optimal solution for your needs.
