

PRESS RELEASE

TinyMDM achieves ISO 27001 certification: a mark of excellence in data security for mobile device management

Nantes, July 2, 2025 - **TinyMDM**, the French Android mobile device management (MDM) solution developed by Ars Nova Systems, has reached a major milestone by obtaining the **ISO/IEC 27001:2022** certification. This internationally recognized standard for information security validates the company's comprehensive processes designed to ensure optimal protection of customer data.

A rigorous audit for enhanced security

Achieving this certification required a thorough and demanding audit of internal processes, IT infrastructure, and data management policies. This success demonstrates the maturity and strength of TinyMDM's Information Security Management System (ISMS).

"Obtaining the ISO/IEC 27001:2022 certification reflects our company-wide commitment to building a strong security culture, one that goes beyond the product and encompasses our entire organization," says **Romain Cousseau, Chief Information Security Officer at Ars Nova Systems**. *"It proves our dedication to placing security at the core of everything we do."*

Cybersecurity at the core of our strategy

In response to growing cyber threats, Ars Nova Systems has made cybersecurity a central pillar of its strategy. Protecting sensitive information, anticipating risks, and ensuring data confidentiality, integrity, and availability are key priorities embedded at every level of the solution. With robust encryption mechanisms, strict access controls, and regular audits, TinyMDM provides clients with optimal protection for their sensitive data, while simplifying the management of their device fleets.

Yann Mareschal, CEO of Ars Nova Systems, adds: *"This certification reflects our commitment to delivering a mobile device management solution that is accessible, high-performing, and deeply secure. It confirms our long-term dedication to our clients and the values that drive us."*

TinyMDM's central role in enterprise protection

Mobile Device Management plays a vital role in modern cybersecurity. TinyMDM enables businesses to secure their mobile devices, manage apps and updates, and enforce strict security policies such as remote wipe or automatic lock. The ISO/IEC 27001:2022 certification strengthens TinyMDM's position as a trusted partner in this rapidly growing ecosystem.

A French solution with global reach

Already recognized for its ease of use and accessibility, TinyMDM continues to stand out on the international stage. The ISO/IEC 27001:2022 certification marks a new step in positioning TinyMDM as a reliable partner for organizations of all sizes, around the world.
